PROJECTS

PORTFOLIO WEBSITE

This is a personal showcase of my skills, experience, and projects, designed and developed entirely using HTML, CSS, and JavaScript. Here, you can explore my professional background, view my resume, and check out the projects I've worked on. My focus is on clean design, interactive functionality, and creating a seamless user experience. Let's connect and build something amazing together!

PODCAST STREAMING WEBSITE

This podcast streaming website is a dynamic platform built using HTML, CSS, and JavaScript, designed to deliver an engaging user experience. The site features a sleek interface for browsing and playing podcasts, responsive design for accessibility across devices, and interactive elements for seamless navigation.

COFFEE MACHINE

Designed and built a fully functional coffee machine prototype powered by an Arduino microcontroller. Integrated servo motors for precise control of coffee dispensing and mixing mechanisms. Programmed the system for automated brewing cycles, ensuring consistency and user customization. This project highlights my expertise in hardware integration, programming microcontrollers, and creating innovative solutions in embedded systems.

KEY ACHIEVEMENTS

LETTER OF RECOGNITION

"Received a letter of recognition for exceptional dedication and outstanding contributions to the JU Makerspace."

TECH-A-THON

"Actively participated in Techathon 3.0 at Gautam Buddha University, Greater Noida in 2022."

VOLUNTEERING

MEMBER

JU MAKERSPACE

"Member of a student-driven innovation cell, Makerspace, where I developed numerous projects and organized events."
